

MISTRAL

WORKTOPS

25mm Solid, Enhanced Acrylic Worksurfaces

A worktop range that combines high quality and superior performance with the appearance of natural stone, quartz, and even marble with our luxurious Unique Collection finishes.

Materially better

MISTRAL worktops are expertly manufactured from an enhanced acrylic-based resin and a natural mineral, aluminium trihydrate (100% silica-free). Our vast experience informed the desired characteristics for our solid surface material and we then designed the recipe to deliver them. The result is a product with an array of features specifically suited to use as a kitchen worksurface. MISTRAL's pure 25mm thick format then amplifies each of these features to great effect.

Our MISTRAL worktops can be cut, shaped and seamlessly joined with ease offering great design potential. While our products are supplied in the standard sizes listed below, these should be seen as the building blocks for whatever your layout requires. From straight runs to L-shapes, U-shapes and kitchen islands, MISTRAL worktops can be crafted to fit your needs.

Here are the standard sizes for our MISTRAL range:

Product	Size
MISTRAL Solid Surface - Standard Worktop	3010mm x 625mm x 25mm
MISTRAL Solid Surface - Breakfast Bar	2080mm x 900mm x 25mm
MISTRAL Solid Surface - Sheet	3010mm x 760mm x 12mm
MISTRAL Solid Surface - Upstand	3010mm x 100mm x 12mm
UNIQUE COLLECTION (MISTRAL) - Standard Worktop	3010mm x 650mm x 25mm
UNIQUE COLLECTION (MISTRAL) - Breakfast Bar	2100mm x 940mm x 25mm
UNIQUE COLLECTION (MISTRAL) - Sheet	3010mm x 760mm x 12mm
UNIQUE COLLECTION (MISTRAL) - Upstand	3010mm x 100mm x 12mm

Seamless

At the heart of every MISTRAL kitchen are the seamless joints that discreetly form one continuous surface that flows around the room as if moulded from a single piece. Each joint is smooth and physically seamless with no gaps or lines of filler.

Hygienic

MISTRAL is smooth and non-porous so it is inherently hygienic and resistant to staining without needing to be sealed. MISTRAL's non-porous surface does not allow stains to penetrate. Any spills can simply be wiped clean with a cloth and soapy water, or with the assistance of a general household cleaner.

Durable

MISTRAL is a strong and durable surface and will cope well with the rigours of day-to-day use in the home. It also has high levels of chemical and heat resistance.

Limitless Design

MISTRAL is made entirely of solid surface material. This allows it to be angled and curved to fit your design effortlessly. MISTRAL's endless options give you the advantage of being able to create unique features and bring your ideas to life.

Warranty

MISTRAL's beautiful appearance and valuable physical qualities are backed up by a field-tested 10-year manufacturer's warranty. MISTRAL has been installed, tested and proven in a variety of tough commercial applications before being utilised in the residential sector.

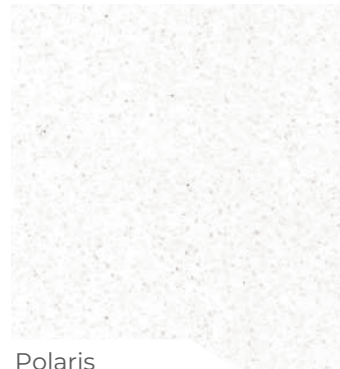

Replenishable

Unlike most other worktop materials, the surface of MISTRAL can be sanded. This means it can be refinished at any time during its life to remove any general wear and tear marks that may have accumulated, leaving it looking as good as new.

THE UNIQUE COLLECTION

The Unique Collection has been developed to emulate the beauty of natural stone, from classic marbles to the majestic swirls of granite, in a worktop that offers the design possibilities and practicalities of use that our MISTRAL range is renowned for.

Each worktop has a natural variation, with the flow of the pattern creating an organic appearance and adding a whole new dimension to surface design. The pattern is unique within every worktop and sheet, and this random character is the essence of these wonderful decors.

Buying Mistral

Samples

To help you choose the perfect MISTRAL colour for your requirements, we provide a sample service to help give you a better idea of the colour and tone, along with a true feel of the material itself. Please visit our website and click the 'Request Samples' link to order your free samples.

Find a Supplier

If you are not already in contact with a MISTRAL retailer, you can use our website to get in touch with us and we will provide you with details of retailers in your area that will be able to help. Our products are readily available with minimal lead times, so orders/deliveries can be arranged to fit in with your project's schedule.

Installation

MISTRAL worktops have been developed to make installation easy, as they can be cut, machined and finished using standard woodworking tools. A professional tradesperson who regularly fits kitchens with worktops such as laminate has the requisite skills to install them. Please note, MISTRAL is not a DIY product.

Colour Choice

The foundation of each MISTRAL worktop is the same, so you will get the same great MISTRAL performance no matter which colour you choose with the following considerations:

Dark Colours - Darker colours show general wear and tear more readily because any scuffs and marks that may appear will be white. The contrast between this and the dark surface makes them more apparent than they would be on a lighter surface.

Light Colours - Light/White colours of MISTRAL will, as with other white surfaces, show up spills and "stains" more than a darker, patterned surface. Make sure to wipe up spills when they happen.

UNIQUE Colours - The patterning of these colours has either directional or random swirls and will not flow through from piece to piece. This can make the location of the joint more visible when joining these products to create corner joints or a larger Island.

Everyday use and care

Spills and 'Stains'

Although MISTRAL surfaces are completely non-porous, it is still recommended that any spills are wiped up as soon as they occur. Any dried-on spills can always be removed, but the longer they are left, the harder they may be to remove.

Heat Resistance

MISTRAL worktops have been developed to offer high levels of fire safety and cope well with heat. However, as with all worktop materials, intense heat has the potential to damage the surface. To prevent any issues you should not place objects directly from a heat source, or any heat-generating appliances onto the surface without using a heat pad, mat or trivet.

Protecting the Surface

MISTRAL worktops are durable and impact resistant enough to cope with the rigours of day-to-day use, but to ensure that they do not sustain any undue scratches we recommend that you never cut objects directly on your MISTRAL worksurface, always use a chopping board or worktop saver. Also, avoid sliding hard and rough objects across your worktop, especially those with unglazed ceramic bases as ceramic is extremely hard and will most likely scratch the surface.

Chemical Resistance

Avoid exposing your MISTRAL surface to strong chemicals such as oven cleaners, drain unblockers, paint removers etc.

Peace of mind

Our MISTRAL Product Warranty represents a guarantee against manufacturing defects for ten years made by Karonia Ltd to the registered owner of the MISTRAL product from the day it is purchased. This Warranty is valid for the first twelve months from the date of purchase but can be extended to the full 10 years if the installation is registered with Karonia within the first 60 days.
